Section 2: Evaluation Criteria

Please enter a mark, ranging from 1 to 5, for each of your group members. Identify your group members by name in the space provided.

Do not fill in the totals row. You are not required to rate your own contribution.

Please try to assign grades that reflect how you really feel about the extent to which the other members of your group contributed to your learning and/or/your group's performance. If you give everyone pretty much the same score you will be hurting those who did the most and helping those who did the least. The individual who is being reviewed will not be told which team member was asked to complete the questionnaires.

I hereby certify that I have provided an honest and **professional** assessment of the contribution of my teammates to our team's group project as per the rubric given. My peer assessment grades are not based on any in or out-of-class agreements among my teammates and me to distribute points in a particular way (i.e., a way that does not consider the quality or quantity of individual efforts fairly).
